

Pyramid Semiconductor Corp. Appoints LXI Components, Inc. as Authorized Distributor Covering North America

Sunnyvale, Calif. - October 31st, 2025

Pyramid Semiconductor Corp. (“Pyramid”), a leading supplier of high-reliability legacy and obsolescence-mitigation semiconductor devices for mission-critical applications, today announced the appointment of LXI Components, Inc. (“LXI”) as an additional authorized distributor for North America, encompassing the United States, Canada, and Mexico.

Founded in 1994 and headquartered in Tampa, Florida, LXI Components is a focused-line franchised distributor specializing in passive, electromechanical, and interconnect components. LXI serves a wide range of industries — including aerospace, defense, government, marine, industrial, and medical — and is certified to ISO 9001, registered as ITAR compliant, and recognized as a HUBZone and Minority-Owned/Small Disadvantaged Business by the U.S. Small Business Administration.

Partnership Synergies

- North American Coverage: LXI’s established sales and logistics network in the U.S., Canada, and Mexico extends Pyramid’s reach to major OEMs, contract manufacturers, and repair depots supporting legacy programs.
- Compliance Strength: LXI’s ISO 9001, HUBZone, Minority-Owned, and ITAR credentials complement Pyramid’s focus on traceability, reliability, and export-controlled programs.
- Focused Expertise: LXI’s narrow concentration in passive, electromechanical, and interconnect lines adds adjacent BOM support around Pyramid’s hi-rel semiconductor portfolio.
- Shared Mission: Both companies are committed to sustaining critical military and aerospace systems through trusted supply-chain partnerships.
